

TABLE OF CONTENTS

S. NO	PAPER TITLE WITH AUTHOR	PAGE NO
1	Hydro-Informatics Decision Engines Integrating Remote Sensing and Predictive Modeling for Water Resource Management <i>R. Gopalakrishnan</i>	1
2	Personalized Longevity Healthcare Through Artificial Intelligence and Predictive Modeling for Aging Populations <i>Dr. Aswathy SU</i>	12
3	Integrated Hybrid Space-Earth Observation Platforms Combining Satellite Remote Sensing and Ground-Based Sensors for Early Detection of Extreme Climate Events <i>Dr.C. Rajan</i>	21
4	Biohybrid Urban Infrastructure Systems Incorporating Living Materials for Passive Mitigation of Urban Heat Islands and Improved Air Quality <i>Dr. Srishti Singh Chauhan & Dr. Abhijeeta Nandha</i>	37
5	Federated AI Models for Cross-Border Environmental Risk Assessment and Policy Simulation in Transnational River Basins <i>Dr. Sushma Dubey & Dr. Anamika Pandey</i>	56
6	AI-Driven Bioinformatics Framework for CRISPR-Based Genetic Analysis <i>S. Sindhu</i>	76
7	AI-Powered Waste Management Systems for Urban Sustainability and Zero Waste Goals <i>Dr.M.N. Vimal Kumar</i>	84
8	Leveraging Edge Computing for Real-Time Monitoring and Disaster Management in Flood-Prone Areas <i>Dr.M. Irshad Ahamed</i>	92

9	Multimodal Earth Observation Using Deep Neural Fusion for Real-Time Environmental Change Detection <i>Dr.M. Dev Anand</i>	101
10	Synthetic Biology Platforms for Scalable Biopharmaceutical Manufacturing <i>Dr. Priya Paul & Dr. Pokhraj Sahu</i>	112
