About ICLEAS 2026

ICLEAS 2026 (International Conference on Life, Environmental, and Applied Sciences) is a distinguished international conference that brings together researchers, academicians, industry professionals, scientists, and emerging scholars from around the world. The conference serves as a dynamic platform for presenting innovative research, exchanging knowledge, and fostering interdisciplinary collaboration across the fields of life sciences, environmental sciences, and applied sciences.

Organized by Scientia Forum, ICLEAS 2026 is committed to promoting scientific excellence and encouraging meaningful discussions on contemporary challenges and emerging trends. Participants will have the opportunity to showcase their latest research, engage with leading experts, build global research networks, and explore collaborative opportunities that contribute to sustainable development and technological advancement.

Through keynote lectures, technical sessions, paper presentations, and interactive discussions, ICLEAS 2026 aims to inspire innovative ideas, strengthen academic and industry partnerships, and support the development of practical solutions that address today's global scientific and environmental challenges. The conference welcomes contributions from diverse disciplines, making it an inclusive forum for knowledge sharing, professional growth, and impactful research.
