

Conference Tracks

Track 1: Engineering Innovations and Smart Technologies

Session Topics:

- Sustainable and Green Engineering
- Smart Grid and Energy Systems
- Robotics and Mechatronics
- AI, IoT, and Industry 4.0 Applications
- Embedded Systems and VLSI Design
- Additive Manufacturing & 3D Printing
- Simulation, Modelling & Digital Twin Systems
- Civil, Mechanical, and Structural Innovations

Track 2: Scientific Advancements and Emerging Technologies

Session Topics:

- Nanotechnology & Advanced Materials
- Biomedical & Life Sciences Research
- Environmental & Climate Science
- Biotechnology in Healthcare and Agriculture
- Applied Physics & Chemistry in Technology
- Space Science and Satellite Applications
- Quantum Computing & Optics
- Sustainable Development in Science

Track 3: Contemporary Management and Data-Driven Strategy

Session Topics:

- Strategic Management & Organizational Leadership
- Human Resource Management in the Hybrid Era
- Digital Marketing & Consumer Insights
- Financial Management, Risk & Compliance

- Business Analytics & Data-Driven Decision Making
- Entrepreneurship & Innovation Ecosystems
- Corporate Governance & Business Ethics
- Tech-Enabled Business Models and Transformation
