

TABLE OF CONTENTS

S. NO	PAPER TITLE WITH AUTHOR	PAGE NO
1	Data Driven Anomaly Detection Framework for Industrial Cyber Physical Systems Using Deep Learning <i>V. John Peter & V. Sofia Mary</i>	1
2	Computational Intelligence-Based Optimization of Wireless Sensor Networks for Smart City Environmental Monitoring <i>R. Tamilkodi & Dr. K. Valli Madhavi Koti</i>	10
3	Hybrid Quantum-Inspired Signal Processing Model for Secure Image Transmission in Next-Generation Communication Networks <i>Dr.J. Gladson Maria Britto & Dr.K. Shanthi Latha</i>	20
4	Multi-Modal Deep Learning Architecture for Medical Signal and Image Fusion in Clinical Decision Support <i>G.P. Logesh</i>	30
5	Scalable Big Data Analytics Pipeline for Real Time Network Traffic Prediction Using Advanced Machine Learning <i>V. Vivekanandhan & Anantha Raman Rathinam</i>	40
6	IIoT-Driven Automation Architecture for Renewable-Integrated Smart Grids in Energy-Intensive Industries <i>G. Srinivasa Raju</i>	51
7	Digital Twin and Big Data Analytics for Energy-Efficient Smart Manufacturing in Industry 4.0 Environments <i>V.S. Aswathy</i>	61
8	Deep Reinforcement Learning-Based IoT Energy Management System for Smart Cities and Green Microgrids <i>Dr.S. Murali & G.P. Logesh</i>	71
9	Smart Materials-Enabled Sensing and Control Framework for Condition-Based Maintenance in Cyber-Physical Production	81

	Systems <i>Dr.J. Biju</i>	
10	Edge-AI Assisted Signal Processing for Real-Time Fault Detection in Sustainable Power Distribution Networks <i>Lakshmi Nalla</i>	91
